

MEMORANDUM

TO: Solid Waste File
FROM: Frederic L. Stiegler, Jr. *FLS*
DATE: April 30, 1971
SUBJECT: Visit to Tybout's Corner Sanitary Landfill.

On March 31, 1971, Mr. Donald K. Harmeson, Mr. B. E. Lane and Mr. Frederic L. Stiegler, Jr., met with Mr. Tom White, Landfill Supervisor, to discuss a proposed addition to this facility. At the present time, this facility is practically completed and approximately two (2) weeks are left before it is filled. Two separate locations were proposed and an extension of this existing facility.

Location #1: Immediately to the rear of the property owned by Wallace Neilson. This area consists of about 2½ acres and has been excavated for a gravel pit. This entire area would fall within the 1,000 foot restricted area. It appears however, that this 1,000 foot requirement may be waived due to various factors. This site appears to be the least desired of the two (2) due to its proximity to homes.

Location #2. This location also consists of 2½ acres and is adjacent to Cherry Road, Route # 405. A tributary of Red Line Creek is adjacent to the area however, is separated by 200 - 300 feet of a barrier section. Mr. Lane feels that this 200 - 300 feet separation is adequate to prevent

any seepage into Red Line Creek. This location is also within the restricted 1,000 feet minimum distance. However, it is felt that a variance can also be issued. This location is the preferred of the two (2), and it will probably be recommended as the preferred site.

Mr. Dutcher has been requested to forward to this office a detailed sketch of both areas outlining the boundaries of each.
